OBJECTIVE

Developing expertise in web development with a particular focus on Front End and UI/UX design innovation. Passionate about creating engaging, responsive, and real-time web applications. Skilled in integrating modern technologies for impactful digital experiences. Knowledgeable in Frontend and enhance system efficiency. Continuously learning and evolving to stay ahead in the tech industry.

TECHNICAL SKILLS

Frontend: HTML, CSS, Bootstrap Frame work, JavaScript
Backend: MERN , PHP, MySQL .
Programming: Python (Basics) .
Tools: Git, GitHub Version Controls, MS Excel.
Familiar: Web Designing, System Management & Maintenance, Networking.

MINI PROJECT

Parallel Tracking Sense Using AI Bot

Situation: Managing daily expenses manually can be inefficient, leading to poor financial tracking and lack of real-time insights. Users need an automated system to streamline transactions and receive timely updates.

Task: Develop a multi-transaction expense tracking system that allows users to log expenses, receive notifications via Email/Telegram, and store transaction history securely.

Action: Designed and implemented an AI-based tracking system, integrating real-time data processing and multi-threading for parallel execution.

Result: Delivered a seamless and intuitive financial tracking system that improves user financial management, providing instant transaction updates and long-term expense insights.

EDUCATION

2021 - 2022 Higher Secondary (Bio-Maths), Kavaraipettai, Chennai - 601206

2022 - 2025 Bachelor of Computer Science ,CGPA: 8.42 , Krishnapuram, Ponneri - 601204

PERSONAL TRAITS

Positive: Preconscious, always prepared with a backup plan to handle unexpected challenges.

Negative: Easily influenced by others and sometimes takes on responsibilities that aren't mine.

HOBBIES

Travelling and exploring new places

Eager to learn new things, even outside my domain
